PERCUSSION®

Percussion communicates

In order to reinforce the image and notoriety of the PERCUSSION® brand among hunters, for several years we have communicated constantly. We have notably placed advertisements in the most widely read magazines by our consumers, among which are *Le Chasseur Français*, *Deutsche Jagd Zeitung*, *Shooting Gazette*, *Connaissance de la chasse*, *The Field*.

Dear customers,

we are pleased to present our new PERCUSSION® collection. In this catalogue you will find the largest range of clothes, boots, shoes and accessories for hunting enthusiasts.

For whatever kind of hunting – Driven shooting, Wildfowling, Deer stalking, Rough shooting, Pigeon shooting –, whatever the weather – hot, cold, dry, wet –, you will find in our collection the articles you are looking for. Fulfilling all possible uses, our products are innovative, attractive, practical and resistant. They give the best value for money on the market.

We are highly attentive to every detail and all our products are subject to strict manufacturing requirements. All our garments are made in the most suitable material according to their end purpose. The characteristics of the fabrics, that we select are checked in the laboratories of the French Textile and Clothing Institute. We test all our garments in real-life situations to guarantee practicality, comfort and durability to consumers.

For 20 years, we have done the best to provide the most researched and competitive products. We shall continue our efforts to satisfy you and merit the trust that you have shown us.

The advantages of a hunting garment by **PERCUSSION**

Hunting jackets, vests or trousers are meant for technical and intensive use. Their design and manufacture should be subject to very careful attention so that they satisfy perfectly the requirements of their users, especially regarding practicality, comfort and resistance. All our products are designed with the cooperation of numerous hunters, they are tested in real-life situations and their manufacture is subject to rigorous controls.

THE REVOLUTION **GHOST CAMO**[®]

GhostCamo fabrics (a TreesCo[®] exclusive) reflect all the nuances of nature in high definition.

A Percussion exclusive, GhostCamo camouflage is available in 3 colour choices (blaze & black, forest & colours and wet & colours).

These are available in 4 types of fabric: Water-repellent treated polycotton (Palombe range), Skintane[®] Optimum (Brocard and Grand Nord ranges), triple layer Softshell and Polartane.

Fabric: at the heart of the quality of Percussion® clothing

Our five main ranges are developed around fabrics that we have selected and perfected:

Polycotton is perfectly adapted for early season shooting, a period when the weather is usually mild. It offers unbeatable value for money. Thanks to its water-resistant treatment (DWR), it resists short, light rain showers.

Impertane®, a Percussion® exclusive, is made of a polycotton fabric which receives a multi-layer waterproofing coating on both sides. Impertane is supple, resistant and easy to maintain.

Skintane® Optimum, a Percussion® exclusive, is a 100% polyester fabric the back of which is laminated with a waterproof and breathable membrane. Skintane® Optimum has exceptional characteristics:

- waterproof, it resists high water pressure (5000mm);
- breathable, it allows the water vapour produced by perspiration to evacuate regularly (5000g/m²/day);

- resistant, it guarantees excellent resistance to abrasion;
- supple, for comfortable movement;
- silent for Deer Stalking.

Exclusive to Percussion: GhostCamo camouflage comes in 3 colour schemes (Blaze & Black, Forest & Colors and Wet & Colors). It is available in four types of fabric: water-resistant polycotton (Palomberange), Skintane Optimum (Brocard and Grand Nord ranges), triplelayer Softshell and Polartane.

Softshell is a fabric made up of 3 layers that offers exceptional characteristics:

- waterproof, it resists high water pressure (5000mm);
- breathable, it allows the water vapour produced by perspiration to evacuate regularly (5000g/m²/day).

Which fabric for what type of weather?

Choosing your hunting outfit always depends on one essential criterion: the weather. There is a specific Percussion® range for each weather condition. Each range is designed from a fabric that is perfectly adapted to the expected temperature and rainfall. You will find the picture symbols opposite on the pages of this catalogue. It covers all the types of weather conditions possible and all the ranges of our collection.

HOT & DRY

MILD & DRY

RAIN

COLD & WET

Washing instructions:

All our garments have a label on the inside with washing instructions, but please note that all our jackets, vests, hunting trousers and tapered trousers should be machine washed at 30° without conditioner. They must never be placed in a tumble dryer. The heat generated may damage the technical qualities (waterproofness, breathability, resistance, etc.) of the garment.

In addition, we do not recommend ironing for most of our hunting clothing.

THE RIGHT SIZE – Most of our jackets and vests are labelled in both French and Anglo -Saxon sizes (S, M, L, XL, XXL, XXX L). Below is how these sizes compare:

GHOST CAMO®
blaze & black

GHOST CAMO®
forest & colors

GHOST CAMO®
wet & colors

The ideal camouflage for remaining visible to other hunters, yet invisible to game. The majority of our GhostCamo Blaze & Black fabrics meet EU standards.

Whether hunting in the open, in a hide, GhostCamo Forest & Colors provides the hunter with adequate camouflage in the majority of European biotopes.

This Wet & Colours camouflage keeps both hunters and fishermen fully hidden in marshlands and coastal areas, by rivers and lakes and among reeds and harvested corn fields.

Safe, strong and functional

- For more than 7 years now, Percussion has been designing, developing and manufacturing footwear for the extremely demanding sport of hunting.
- Wellington boots, boots, slip-on shoes... all Percussion branded products are subject to a meticulous design process and continuous quality controls. Tests at the Technical Shoe Centre (TSC), field tests carried out by professional hunters, controls at each stage of the production process, nothing is left to chance.
- Every effort is made to provide the hunters with comfort, durability and maximum performance; for all types of hunting and in all weather conditions.
- For both clothes and footwear, our quality requirements remain the same. As does our legitimacy within the hunting market.

THE CHAMPIONS BRAND

It is not always easy for a brand to choose its standard-bearers. Iconic celebrities quickly go out of fashion and, worse still, have only a distant link with the activity they support.

Launched in 2007, the Percussion team is not about to encounter this type of concern. What could be more coherent for a brand of hunting clothing than to be represented by the cream of the professional and amateur dog breeders and handlers?

At the centre of the hunting world, the members of the Percussion team monopolise the best places in the national and international field-trials. Dressed from head to toe in Percussion colours, they are our best ambassadors.

Alicia Anger, française Meisterin der Renccontres Saint Hubert 2011 (Junioren) und 2013 (Jägerinnen)
